At a district level, we are ALL extremely thankful for these products. Now our students can follow one curriculum from early childhood all the way to after graduation without losing any data. Students now have a starting point at the beginning of each school year, and no data is lost when transitioning from elementary to middle, or middle to high school. From a district level, we're also able to monitor teacher/student usage. In addition, teachers can monitor student growth based on their monthly checkpoint. These programs are GREAT and highly recommended to anyone interested. They will do all the work for you, so teachers only have to worry about teaching.
