

 **polaris**® + **unique**™  
learning system

## Better **TOGETHER**

Bring teams together and streamline the IEP development cycle! By pairing Polaris with Unique Learning System your teams will be able to collaboratively write present levels of performance and goals, as well as deliver specially designed instruction (SDI). Because real-time data from Unique Learning System connects directly to Polaris, compliance will be easier to demonstrate. This powerful combination supports your IEP team as they build a plan that lives, grows, and evolves with the student's learning journey.

# Quality IEPs that support **COMPLIANCE AND STUDENT SUCCESS**

## STREAMLINE THE IEP PROCESS

Synchronize the IEP team, including parents and caregivers, in one workspace. Unique Learning System data syncs with Polaris, allowing teams to collaborate and evaluate data in one place, leading to a better PLAAFP.

## DEVELOP STUDENT-CENTERED IEPs

Monitor progress in real-time with multiple data points using Polaris and Unique Learning System. With a meaningful plan built using both solutions, the team can create a student-centered IEP and adjust instruction to meet individual needs.

## DEMONSTRATE COMPLIANCE

A compliant IEP relies on collaboration, includes a well-written PLAAFP and clear goals, and informs instruction. With ongoing progress reviews, Polaris gives teams confidence in compliance while ensuring student success.
