

WEARING MASKS IN BUSINESSES

A Person Shopping in Target with a Face Mask

Customers must wear face masks in many businesses across the U.S. now. Some of these businesses include Walmart®, Target®, CVS®, Kohl's®, Panera Bread® and Starbucks®. The businesses hope that requiring face masks will help stop the spread of the coronavirus. Many states have had increases in the number of people diagnosed with the coronavirus. Many scientists think wearing face masks can help stop the spread of the coronavirus. The coronavirus spreads from person to person through germs. People who are sick can spread germs when they cough, sneeze or talk. Face masks cover people's mouths and noses and may help stop germs from spreading.
